

Save West Beach Project Update!

In 2010, Madockawanda Lodge voted to undertake the large-scale project of renovating and improving the facilities of West Beach at Camp Hinds. The plan included building a brand new dock system, a new lifeguard chair, moving and repairing 70 feet of the boardwalk, and building a new fence. *Thanks to your help & support, we are happy to report that the boardwalk was moved and repaired in the late fall and early spring, the old fence was torn out and replaced with one that matches the Main Waterfront, and last, but certainly not least, a new lifeguard chair was built with the help of Pack 310 from Saco!*

Completed

New Boardwalk!

Completed

New Lifeguard Chair!

Phase 2 - New Docks!

With the start of 2012 it is now time to begin *Phase Two* of our Save West Beach project. This involves building the swimming area docks. The design of the docks (composite decking on top of pressure treated frames) and an outline of costs have all been set and the project is ready to begin!

In 2012 the lodge is committed to completing half the docks with the remainder of project being completed by the start of the 2013 season!

The lodge leadership is asking everyone to help promote the project and raise the funds. The limited edition West Beach patches (\$5 for a “black border” & \$50 for a “gold border”) can be purchased during your unit elections, through your lodge & chapter officers, or at the PTC Office.

Donations can be made by contacting Lodge Adviser Bruce Rueger (rueger@roadrunner.com). With your help, we can complete the restoration of West Beach and provide a new & improved waterfront for the thousands of Scouts who spend their summers on the shores of Panther Pond!
